Portfolio: <https://Paulofph.onrender.com>

Summary

Full-Stack JavaScript Developer (MERN Stack) with hands-on experience building scalable web applications, integrating APIs, and developing real-time systems. Strong foundation in both frontend (React.js) and backend development, with growing expertise in system architecture, data handling, and secure application design.

Experienced in building user-focused applications, collaborating in teams, and translating technical concepts into practical solutions. Passionate about developing digital systems that improve real-world operations, particularly in healthcare and enterprise environments.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML, CSS, JavaScript
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Other:** REST APIs, Authentication, Socket.IO, Cloudinary
- **Systems:** Networking, Linux, Cybersecurity Basics
- **Tools:** VS Code, Postman, Git/GitHub, CorelDRAW

Experience

FrontEnd Developer Intern

(MR Soft International – Port Harcourt, Nigeria)

Feb 2024 – Aug 2024

- Built responsive and user-friendly interfaces using React.js
- Collaborated on team projects, contributing to scalable frontend architecture
- Assisted in teaching web development fundamentals
- Participated in feature planning and implementation

Full-Stack Projects (Self & Collaborative)

2024 – Present

- Developed full-stack applications using MERN stack with authentication and database integration
- Built systems with **role-based access control and real-time communication (Socket.IO)**
- Designed and implemented RESTful APIs for structured data handling
- Integrated third-party services such as Cloudinary for media storage
- Developed dynamic UI systems with real-time updates and state management

Network Engineer(Trainee)

(CISCO Networking Academy Remote)

July 2023 – Sept 2023

- Gained hands-on experience with networking, Linux systems, and cybersecurity principles
- Performed system diagnostics and network troubleshooting
- Learned secure communication and system reliability fundamentals

Graphic Designer

(Freelance, Remote-Port Harcourt, Nigeria)

Sept 2019 - Present

- Designed digital assets (logos, flyers, product labels) for businesses
- Improved brand visibility and customer engagement through design solutions

Graphics Design Instructor

(MR Soft International – Port Harcourt, Nigeria)

Aug 2025

- Developed and delivered a structured design curriculum for students aged 7–16
- Taught CorelDRAW and design fundamentals through hands-on projects
- Evaluated student progress and guided project development

Project Highlights

- **Ai Study Partner with Chat System (MERN + Socket.IO)**
 - Built an AI-powered study assistant with contextual chat capabilities
 - Implemented quizzes and flashcard generation features
 - Developed a real-time community chat system using Socket.IO
 - Link: <https://studibuddii.onrender.com>
- **Anonymous Poll System**
 - Developed a polling platform with user anonymity features
 - Implemented secure vote handling and result aggregation
 - Link: <https://pollapp-ovb9.onrender.com>
- **E-commerce Platform**
 - Built a full-stack e-commerce system with admin and user dashboards
 - Implemented cart, checkout, and product management workflows
 - Link: <https://spinelhub.onrender.com>

Education

BSc. Computer Science

(Adeleke University, Ede, Osun)

Graduated: July 2025

Certifications

- Full Stack Web Development (JavaScript – MERN)
- Introduction to Cybersecurity – Cisco
- Operating Systems Basics – Cisco

Additional Strengths

- Understanding of **secure application design principles**
- Familiar with **API integrations and system communication**
- Ability to work on **complex, multi-feature applications**
- Strong collaboration and problem-solving skills
